We focus on therapy, diagnostics, inpatient treatment, early rehabilitation (both in intervals and postoperatively) and consultation. We offer family counselling as well.

Stationary admission:

We need the referral to a hospital.

Our detailed information regarding the inpatient services are supplemented by:

Outpatient presentation:

Counselling, diagnostics and treatment related to all neuropaediatric and socialpaediatric conditions along with neurological problems in development.

Please be prepared to hand over:

- health insurance card
- transfer form
- examination documents (the yellow booklet for preventive checkups)
- other documents

Our phone number: 0049 7084 928391

Clinic school and kindergarten of the clinic

The school of the hospital offers an individual special education training and educational support to all school-attending patients. There is a private school kindergarten for our younger patients, from two years on until they will attend school, providing individual educational training.

Inpatient services

1. We treat and offer rehabilitation to children, adolescents and young adults having sustained cerebral damage either at an early age (around birth) or later e.g. by an accident encompassing:

- interdisciplinary diagnostics, treatment, consultation and care, physiotherapy, speech therapy, occupational therapy
- riding therapy - depending on the season, animal-supported therapy with a horse or dog, music therapy
- water therapy
- bio-feedback treatment
- consultation for aiding devices and its adjustment
- botulinum toxin consultation
- paedaudiological findings and swallowing diagnostics
- orthopaedic findings and therapy planning
- school or school kindergarten education
- psychological diagnostics and social medical help, even in terms of the organisation of daily life after the stay in hospital

Evaluation of older multiple-disabled patients suffering from internal, orthopaedic and neurological problems.

2. Postoperative rehabilitation treatment after neuro-orthopaedic interventions:

- Mobilisation
